Extensive HA	4.93	22.7	2.49	0.57	1.16	40.50	4.45	1.01	2.07

- Values are approximate, based on calculated results.
- Measuring powder by weight yields the most accurate results. If an exact dilution is not required and powder is measured by volume, powder should be level and unpacked.
- As with any powdered infant formula product, use with immune-compromised infants is not recommended. When such use is recommended by a physician, we recommend following the Academy of Nutrition and Dietetics guidelines for safe formula preparation, storage, and administration.

- For Medical Professional Use Only -
