NAN PRO Toddler	12.7 oz	360	98	8.3	92	1755
	28.2 oz	800			204	3901

Values are approximate, based on calculated results. Measuring powder by weight yields the most accurate results. If an exact dilution is not required and powder is measured by volume, powder should be level and unpacked. As with any powdered infant formula product, use with immune compromised infants is not recommended. When such use is necessary, we recommend following the Academy of Nutrition and Dietetics guidelines for safe preparation, storage, and administration.

* Trial/sample sizes only. † Calculation: scoops per cup x grams per scoop = grams per cup. ‡ Calculation: total gram weight of container x (kcal per 100 gram/100).
