

Choose Gerber® Good Start® GentlePro powder, specially designed to be baby's first and only formula

	Gerber® Good Start® GentlePro Powder	Enfamil® NeuroPro™ Infant	Enfamil® Enspire™	Similac Pro-Advance®	Similac Pro-Total Comfort™	Similac Pro-Sensitive®
Protein source	100% whey	60:40 whey:casein	60:40 whey:casein	48:52 whey:casein	100% whey	18:82 whey:casein
Protein structure	Partially hydrolyzed 100% whey protein-partially hydrolyzed is easy to digest and may reduce the risk of developing atopic dermatitis*	Intact	Intact	Intact	Partially hydrolyzed	Intact
Probiotics	Probiotic <i>B. lactis</i> Only routine infant formula with probiotic <i>B. lactis</i> ,† clinically shown to promote a balanced microbiota and help support the developing immune system by: <ul style="list-style-type: none"> Increasing bifidobacteria levels Increasing secretory IgA, a key antibody 	No probiotic	No probiotic	No probiotic	No probiotic	No probiotic
Prebiotics	2'-FL HMO‡ 2'-FL HMO‡ is structurally identical to the predominant HMO in breastmilk to support digestive and immune health	2'-FL HMO‡ + GOS§ + PDX	GOS§ + PDX	2'-FL HMO‡ + FOS¶	2'-FL HMO‡ + FOS¶	2'-FL HMO‡ + FOS¶
Carbohydrate	Lactose, maltodextrin 70% lactose and 30% maltodextrin	Lactose	Lactose	Lactose	Maltodextrin, sugar	Maltodextrin, sugar
DHA % of total fatty acid	0.32% 0.32% of total fat to support brain and eye development	0.32%	0.32%	0.15%	0.15%	0.15%

* For healthy infants who are not exclusively breastfed and who have a family history of allergy, feeding a 100% whey protein-partially hydrolyzed infant formula from birth up to 4 months of age instead of a formula made with cow's milk proteins may reduce the risk of developing atopic dermatitis throughout the first year. The scientific evidence for this is limited, and not all babies may benefit. Partially hydrolyzed formulas **should not be fed to infants who are allergic to milk or infants with existing milk allergy symptoms**. If you suspect a baby is allergic to milk, or if a baby is on a special formula for the treatment of allergy, their care and feeding choices should be under a doctor's supervision.

Breastmilk is the ideal nutritional start for an infant. Infant formula and complementary foods should always be prepared, used, and stored as instructed on the label.
